EDUCATION

Georgia Tech, Atlanta — *Full Stack Flex Bootcamp*

DEC 2020 - MAY 2021

Studied in an intensive six-month coding program. Quickly built on self-taught skills gained through Codecademy. Learned how to design dynamic, mobile-friendly websites, how to write logic, and how to manage servers and databases.

PROJECTS

Hound And Seek — *Back-end development*

An application that displays images of animal breeds and helps the user find a local shelter. Heather wrote the JavaScript and jQuery that communicates with the Petfinder API and retrieves shelter information.

Workday Planner

A color-coded day planner application that allows the user to schedule their day's tasks. It was written in JavaScript, HTML, and CSS, and uses Moment.js.

https://github.com/sorengrey/Day-Planner/

Weather Dashboard

A website that allows the user to search for weather conditions based on their city name. It uses Bootstrap, HTML, CSS, Javascript, and the OpenWeatherMap API.

https://github.com/sorengrey/OpenWeather-Dashboard/

TECHNICAL SKILLS

JavaScript

jQuery

HTML

CSS

Bootstrap

JSON

Node.js
